

Commission has amended Umetco Mineral Corporation's (Umetco's) Source Material License SUA-648 to change a reclamation milestone date. This amendment was requested by Umetco by letter dated October 11, 1995, and its receipt by NRC was noticed in the Federal Register on November 6, 1995.

The license amendment modifies License Condition 59 to change the completion date for a site-reclamation milestone. The new date approved by the NRC extends completion of placement of final radon barrier on the Heap Leach impoundment by two years. Umetco attributes the delay to the following factors: (1) At present there is no approved reclamation plan for the Heap Leach impoundment, partly because of delay in seismic evaluation of the site by the NRC staff; (2) Radium concentrations in the outcrops of the Heap Leach impoundment have been identified that may require redesign of this feature to comply with 10 CFR Part 40, Appendix A, Criterion 6(b); and (3) Umetco has decided, in a good faith effort, to upgrade the final design to provide the necessary and reasonable assurance that the longevity goals will be satisfied. Based on review of Umetco's submittal, the NRC staff concludes that the delay is attributable to factors beyond the control of Umetco, the proposed work is scheduled to be completed as expeditiously as practicable, and the added risk to the public health and safety is not significant.

An environmental assessment is not required since this action is categorically excluded under 10 CFR 51.22(c)(11), and an environmental report from the licensee is not required by 10 CFR 51.60(b)(2).

SUPPLEMENTARY INFORMATION: Umetco's license, including an amended License Condition 59, and the NRC staff's technical evaluation of the amendment request are being made available for public inspection at the Commission's Public Document Room at 2120 L Street, NW (Lower Level), Washington, DC 20555.

**Virginia Electric and Power Company
Notice of Issuance of Amendment to
Facility Operating License**

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment Nos. 207 and 207 to Facility Operating License Nos. DPR-32 and DPR-37 issued to the Virginia Electric and Power Company (the licensee), which revised the Technical Specifications for operation of the Surry Power Station, Units 1 and 2 located in Surry County, Virginia. The amendments are effective as of the date of issuance.

The amendments modified the Technical Specifications to revise the reactor vessel pressure/temperature limit and an associated low temperature overpressure protection system setpoint.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with this action was published in the Federal Register on August 4, 1995 (60 FR 39978). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendments will not have a significant effect on the quality of the human environment (60 FR 54710).

For further details with respect to the action see (1) the application for amendments dated June 8, 1995, (2) Amendment No. 207 to License Nos. DPR-32 and DPR-37, (3) the

Commission's related Safety Evaluation, and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room located at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Dated at Rockville, Maryland, this 28th day of December, 1995.

For the Nuclear Regulatory Commission.
